SIZE BY HEIGHT & WEIGHT, NOT AGE

Age ranges are approximate. Two babies the same age can differ by 2–3 sizes. Check the weight and height range on the garment's label for the most accurate fit.

24M VS 2T

24M is cut for diaper wearers (roomier in the seat). 2T is cut like a smaller version of adult clothes. If a child is still in diapers, 24M will fit better even at the same weight.

BRAND VARIATION

Carter's, OshKosh, and Hanna Andersson all run slightly differently. Use the specific brand's size chart when ordering online — these are consensus values, not guaranteed fits.
