MEASURING AT HOME

Stand the child heel-to-wall on a sheet of paper, mark the tip of the longest toe, and measure to the mark in centimeters. Add 0.5–1 cm of growing room. Measure both feet and size to the larger one.

US "C" VS "Y"

US kids' sizes use two scales that reset: Little Kids (1C–13C) and Big Kids (1Y–7Y). A 13C and a 1Y are not the same size — 13C is smaller, fitting roughly a 5–6 year old.

BRAND VARIATION

Half-size differences between brands are common, especially in the 8C–12C range. When buying online, check the specific brand's size guide before ordering.
